

# RS.LA Line Array

- FULLY INTEGRATED
- VERSATILE
- EASY TO RIG

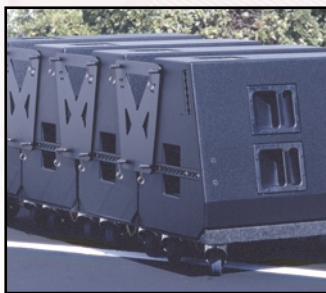

This unique “plug and play” package includes speakers, amplifiers, racks, pre-wired I/O panels and cables as well as caster boards, grids and rigging hardware. The RS.LA delivers incredible performance thanks to our patented TOC™ technology and it allows a regional sound company to satisfy the ever-popular artists’ line array rider. The versatile RS.LA can also be used in conventional vertical array configuration for front and side fills. Two people can rig and fly an eight-box RS.LA array in just a matter of minutes. Nothing rigs faster, sounds better or offers the versatility of the RS.LA.

RS.LA-8 fully integrated system can be flown with two Genie™ ST 20 lifts, featuring PAS Genie™ fly grid

RS.LA-16 fully integrated system. Also available as individual components

Rigid interconnect brackets with load rated, quick release pins offering multiple angles

Enclosures feature integral caster dollies for easy setup
