

# MF-218

## Multi-Functional Bass Bin

PAS introduces the newest member of the heralded TOC product line... the **MF-218**.

**Compact Design:** Like all TOC models, the MF-218 is designed to deliver the purest sound from the smallest possible enclosure. This ultra-compact double 18" cabinet implements PAS' newly engineered LX-2800 woofer for maximum reliability, and the lowest levels of distortion on the market. Weighing in at only 150 pounds, and utilizing PAS' performance conscious space economy techniques, the MF-218 has response down to 30Hz, and a Sensitivity rating of 102 dB@ 50Hz, making it the ultimate sub-woofer for applications where truck and floor space are at a premium.

**Multi-Functionality:** The MF-218 marks a new direction in the TOC line, one that leads to a new set of products that offer the touring professional multiple solutions from a single cabinet. These products allow a system with a small number of cabinets to be easily adapted to a wide variety of applications. When sitting flat on the floor the MF-218 has two pole mount sockets allowing for two mid/high cabinets to be supported. The MF-218 has a third pole mount socket on the side for applications where space is tight and the MF-218 needs to be stood upright and an additional cabinet mounted on top of it. This type of versatility combined with compact design is the product of countless hours of tireless engineering and testing, which have become the trademark of PAS' TOC products.

### ***MF-218 Specifications***

*Frequency Response: 30 to 300 Hz*

*Power Rating: 1000 Watts*

*Nominal Impedance: 4 ohms*

*Sensitivity (1w/1m): 102 dB @ 50 Hz*

*Maximum SPL: 132 dB @ 1 meter (@ rated power)*

*Drivers: 2 X LX2800*

*Input Connectors: 2 x NLA*

*Dimensions: 21" H x 42" W x 24" D*

*Weight: 150 lbs.*
